

# R&D Tax Credits Made Easy

---

## Trusted Partnerships

Making it straightforward to offer a proven R&D tax relief service to your clients, creating extra value for them and incremental revenue streams for your practice.

Through our well established R&D Tax Credits Partnership Programme, we work with accountancy and financial professionals across the UK to unlock their clients capital, fuelling growth and continued innovation.

We guide your clients through the complex procedure of handling claims with minimum input from you – while keeping you informed of progress at every stage.

After an initial fact-find to establish that there is a valid claim, our in-house team of experts carry out the analysis of your client's project expenditure, ensuring the record keeping is accurate and writing a concise report acceptable to HMRC.

We take full responsibility for submission to HMRC and liaise with them throughout the claims process.

Our 100% first-claim success record speaks to the expertise and quality of processes that we deploy, for every claim we manage.

**We really do make it easy for you.**
